

Windows 10 File Explorer

File Explorer is a tool used to browse, view, and manage files and folders on your computer. It is used to access files and folders on your computer, such as Downloads, Documents, Pictures, Music, and OneDrive.

There are two ways to open File Explorer:

1. Click on the taskbar icon. To bring up the taskbar, press the Windows logo key + E.

2. Access the Start menu. To bring up the Start menu, press the Windows logo key.
